ista System sign offers a modular design, clear, precise and innovative, simple and functional.

Lobby

What do you expect from your sign supplier?
Choosing a sign system for your project is a vital decision.

Flexibility and choice is highly important.

A good sign system is one that is well accepted by leading sign professionals anywhere near you, that can be easily installed, updated, upgraded and maintained quickly even by in-house staff. Vista Railway Line offers you that and much more.

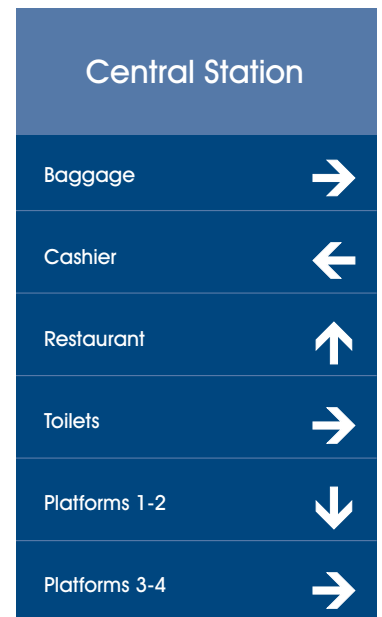

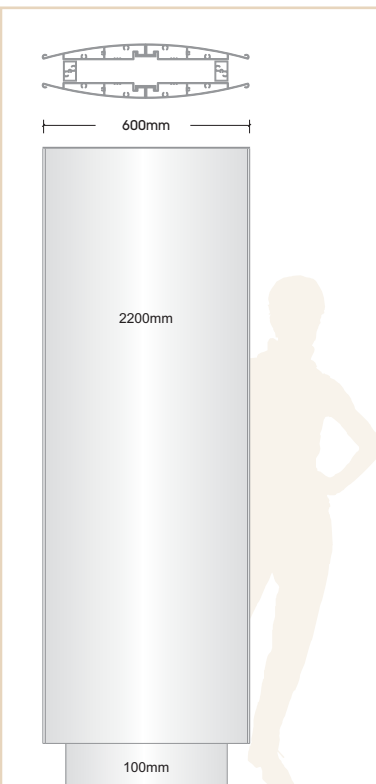

If you board the wrong train, it's no use running along the corridor in the other direction. - Dietrich Bonhoeffer

DSV600/2300

Lobby

■ This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination.

*D*irectional signs and information is paramount in today's bustling world of rail transportation.

Interior Signs

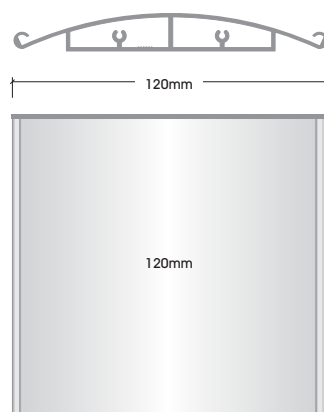

Vista offers a new concept for the sign industry that was developed by sign professionals with the goal of filling a gap between fabricated sign and modular sign systems. MCFT (Modular Curved Frame Technology) offers the best of both worlds by providing the advantages of a modern modular system with the ability to provide a bespoke solution that meets the unique requirements of each sign project. Vista stocks the entire collection of system components for fast delivery from strategically located centers around the world.

Plan your journey

A new journey is always exciting – these tips will help you prepare and make it stress free! Before starting your new school, you can: Look at a map and find your house and your school. Decide how to get from your house to your school. Find the safest route to walk or cycle. Find out how to get there by bus. Get a timetable. Find out the bus times. Decide where to catch the bus. Find out about passes and fares. Have a backup plan in case you miss the bus – ask your parents. Practise the route!

Tough signs for busy environments

Way finding products located within the reach of a crowd need to be tough. Vandalism frequently leads to damage to the signs. Cleaning staff, often need to use strong detergents and course cleaning materials which can also damage the signs.

Vista System utilises state-of-the-art technology to produce sign solutions made from hard anodised Aluminium and powder-coated steel. With MCFT, end caps remain firmly in place thanks to ultra strong screws. All parts are attached together using extremely strong materials without compromising the neat and modern design. Vista system is a frame system; any flat and flexible substrate can be flexed and inserted in to the frame and reinforced to keep it in place! Through simply choosing a tough sign insert, maximum protection is achieved. In rare cases where vandalism to a sign occurs the cost of replacing the insert instead of the whole sign is minimal. The replacement job is fast and easy, even by a novice.
